What to provide

Before we can begin testing the taxi camera security system, we require the following. Please ensure that you have supplied every item along with this form:

- The taxi camera system, components and cables to run the equipment from a 12V supply.
- Computer software (if required), along with information required to access the software.
- All manuals and installation instructions (hard copy or digital form).
- Digital copies of test images taken during the Image Capture Exercise installed in the media of the system.
- Proof of EMC compliance for one of the following:
(CISPR22/EN55022, CISPR32/EN55032, AS/NZS61000.6.3 or EN61000-6-3)

Test Fee

The full test fee is **\$1850.00 + GST**, and full payment is required prior to commencement of the test process. Payment may be made into the bank account below. Ensure you use your company name as the reference and CAMERA TEST as the particulars if possible.

ANZ
Bentech Limited
06-0273-0511893-00

Declaration

I _____ allow Bentech Limited to access the above taxi camera security system for the purposes of compliance testing to NZTA requirements and the Land Transport Rule. I understand that Bentech Limited will only access the system and related software for the purpose of this single test, and will return the hardware and remove all software once the test is complete. I understand that in the event the system does not pass the test, a retest fee will apply once any issues are resolved in order for Bentech Limited to retest the required components.
